Swiftlock Autoclave

Description

Swiftlock Autoclave

Description:

- Stainless steel vessel
- Eco-friendly design – low water and low power consumption; the chamber is designed so the minimum amount of water is needed per cycle
- Variable temperature range, 100 to 138°C (0.2 to 2.4bar)
- Fully automatic once filled with water
- Base tray / shelf
- Thermocouple validation gland with easy access panel
- Over temperature and over pressure cut-out
- Cool interlock (80°C) - fluid cycles only
- Gauge test port
- Safety valve test cycle
- One of the largest easy to use icon driven colour touchscreen's on any benchtop/compact

Safety Features:

- Pressure activated door lock
- Audio-visual end of cycle, cycle fault, cycle interruption
- Sterilisation failure, water low and door unlocked alarms
- Overheat protection
- Two thermal cooling locks in compliance.
