Color Meter for Surfaces, Liquids, and Powders

Description

Color Meter for Surfaces, Liquids, and Powders

Description:-

This handheld color meter measures surface color on graphic arts, painted surfaces, plastics, textiles, and more. The stand features a cuvette holder and secure cap to protect the sample from excessive ambient light. It also supports the meter at an ergonomic viewing angle. The meter stores up to 350 sample measurements. Easily attach a text tag or audio message to any sample for information or identification purposes. Calibrate your color meter quickly and easily with the built-in reference slider. Increase your application versatility by using the meter with its unique stand—enabling color measurements of liquids, pastes, and powders used in the food, cosmetics, and pharmaceutical industries.

Attach text or an audio recording to your results for easy identification.

Each measurement is a combination of 27 images, giving information on color and texture effects.

Illuminate your sample using eight visible and one UV wavelength for more accurate color measurement.
