Color Meter for Surfaces

Description

Color Meter for Surfaces

Description:-

- o Color Meter for Surfaces, 4/8-mm Measuring Area
- o Illuminate your sample using eight visible and one UV wavelength for more accurate color measurement.
- o Each measurement is a combination of 27 images, giving information on color and texture effects.
- o This handheld color meter measures surface color on graphic arts, painted surfaces, plastics, textiles, and more.
- o Compact size and rechargeable batteries let you use this unit in the lab or carry on the plant floor for quality control testing.
- o Store up to 350 sample measurements; attach a text tag or audio message to any sample for information or identification purposes.
