

Product Code . DS-DASGAGM-10475

Density Meters

Description

Density Meters

Description:-

- o Built-in sampling pump automates the filling and emptying of the sample cell
- o Lightweight, ergonomic design accommodates single-handed operation, right or left hand compatible
- o Bright color display and backlit sample cell let you take accurate measurements in any lighting conditions
- o Store 1100 measurements in internal memory
- o This digital, portable density meter makes taking measurements outside of a laboratory setting quick and easy.
- o Simply push up on the joystick and the pump fills the sample chamber.
- o Rugged yet light and ergonomic construction allows frequent testing for extended periods of time without suffering from fatigue.
- o Brightly colored display with intuitive menu-driven interface and glove-friendly single-handed operation offer convenience and ease of use.
- o Backlit sample cell lets you spot bubbles or other artifacts that may affect measurements.

o Whether you are measuring samples at production intervals or out in the field, you will be confident you have accurate results.

o Minimize errors and save time with the automatic internal sampling pump.
