

Product Code . DS-DASGAGM-10502

FSA Torque Cap Tester

Description

FSA Torque Cap Tester

Description:-

Cap tester offers superior performance for the most demanding production or quality control applications. Adjustable steel posts with a non-slip rubber sleeve assures a firm grip on a wide range of container shapes and sizes. Engineered with high output load cells the FSA Torque delivers accurate and repeatable torque measurements. With six modes and applications you can test any container or jar ranging from 0.79" (20 mm) to 7.09" (180 mm) in diameter. A die cast metal housing provides a stable platform for the torque gauge and overall durability for a long life in demanding environments.

- o Wireless data transmitter
- o Removable MicroSD card
- o On screen Stats and analytics
- o 2.75" LCD display with backlight
- o On screen graphing and histogram
- o USB, RS232, and analog I/O interface.
