One Click Digital Melting Point Apparatus

Description

One Click Digital Melting Point Apparatus

Description:-

Ideal for use in chemical synthesis laboratories, pharmaceutical research and more, this melting point apparatus allows manual or automatic determination of melting point. Run up to four samples at once and display a maximum of 30 minutes of grayscale video on the instrument touch screen to investigate clear points and decomposition temperature. Program up to twelve One Click shortcuts for increased efficiency on repetitive measurements. After entering a program, just a push of a button starts the program, freeing you for other important tasks as the program runs. Video magnification of 6x allows easy viewing of smaller samples. Capture statistics such as mean value, min/max, and standard deviation. Print your data using the optional printer for GLP-compliant paper recording. Ergonomic features include small instrument footprint, touch screen controls, and rotatable protection lid. Check your sample for conformity using the substance database incorporated within the unit.
