

Product Code . DS-AAM-10596

Data Logging Vane Anemometer with NIST-Traceable Calibration

Description

Data Logging Vane Anemometer with NIST-Traceable Calibration

Description:-

The Data Logging Anemometer is designed for precision air velocity measurements in five user-selectable units (ft/min, m/s, mph, km/h, or knots). A metallic mounting stand is included that provides an opportunity to position the anemometer to best fit the application. The instrument will help you meet cooling and environmental requirements for safety and comfort. Built-in USB interface and included software allow logged data to be easily downloaded to a PC for analysis and graphing. Comes pre-calibrated, saving you hundreds of dollars and extra waiting time to calibrate separately.

Key Features:

- Reliable measurements, guaranteed, Precalibrated to NIST-traceable standards.
- User-selectable units of measure eliminate the need for conversions.
- Analyze and graph logged data using included software.
- Measure air velocities up to 3937 ft/min (20.0 m/s) to cover broad range of applications.
- Articulated screw-on mounting stand provides flexible positioning to fit the application.

-
- User-defined high and low alarm levels with visual LED indication to bring attention to potential problems.
