

Product Code . DS-AAM-10598

Micro-Anemometer

Description

Micro-Anemometer

Description:-

This compact anemometer measures air velocity in five user selectable values: meters per second, feet per second, miles per hour, kilometers per hour, and knots with a simple one-button operation. The tough ABS plastic housing and water-resistant construction keeps out moisture, dust, and dirt in harsh indoor or outdoor environments. A high contrast backlit LCD display with 3/8" digits makes it easy to read even in total darkness. It also allows you to measure maximum airflow, temperature (in °F and °C), and wind chill temperature with readings updated 2 times per second.

- Rugged ABS plastic housing
- Easy to read backlit display
- Get accurate, reliable measurements with included NIST-traceable calibration.
