

Product Code . DS-AAM-10601

Vane Anemometer with Output and Calibration

Description

Vane Anemometer with Output and Calibration

Description:-

This Vane Anemometer measures and displays wind speed/air velocity and temperature simultaneously on the 1/2"H LCD. Output allows for data acquisition to monitor and store readings on your PC. Switch between five units of measure and °F/°C with the press of a button. Recall Min/Max temperatures and velocities, or freeze the display with the HOLD feature. Traceable products are calibrated to NIST-traceable standards and ready to use as soon as you receive it. Each product goes through an intense vetting process before it can carry the Traceable name, and it includes NIST-traceable certification.

- Get accurate, reliable measurements with included NIST-traceable calibration
- Connect to a PC to monitor and store readings
- Dual-line LCD shows both temperature and air velocity at the same time
- Recall Min/Max readings and freeze display with HOLD feature.
