Heavy-Duty Hot-Wire Thermoanemometer with Datalogger

Description

Heavy-Duty Hot-Wire Thermoanemometer with Datalogger

Description:-

Automatically records up to 16,000 data points in the field along with time and date. Data can later be downloaded to a computer via the RS 232 port and the results viewed instantly on software which comes with the unit. The unit has a fold-out tripod and a large easy-to-read LCD. Comes ready to use in a protective foam-lined carrying case and a metal telescopic hot-wire probe designed for hard-to-reach areas. The software also enables real-time datalogging directly from the meter to the computer. Meter also features min/max, calendar/clock, auto-power off, hold function, and accepts type J or K thermocouple probes.

- Measures air volume, velocity, and temperature
- Accepts type J and K thermocouple probes
- Built-in datalogger, log up to 16,000 data points.
