

Product Code . DS-AAM-10622

Vane Thermoanemometer DID108

Description

Vane Thermoanemometer DID108

Description:-

This Vane Anemometer measures air velocity, air volume, BTU capacity, temperature, humidity, dew point, and wet bulb. Ideal for furnaces, ovens, refrigerators, and air conditioners. Connected by a 20" (50.8 cm) extendable cord, allowing for limitless measurement applications. Constructed with ball bearings, the vane sensor features a smooth and fluent rotation during measurements. Meter features selectable English or metric units, single point averaging of air volume and capacity, and auto-off after 10 minutes.
