

Product Code . DS-AAM-10634

Multifunction Environmental Thermoanemometers

Description

Multifunction Environmental Thermoanemometers

Description:-

Versatile Anemometer uses a low-friction vane and displays air velocity measurements in five units. Dual-line display simultaneously shows relative humidity and temperature, or air velocity and temperature. High-precision humidity sensor provides a quick response time to make accurate calculations for wet bulb, dew point, heat index and windchill readings. External high-accuracy temperature probe expands the measurement range to 14 to 212°F (-10 to 100°C).

- Auto-rotating, dual-line LCD with backlight for easy reading in low light
- Accurately measure air velocity, airflow, temperature, humidity, wet bulb, dew point, heat index, windchill, barometric pressure, altitude, and light
- Operational modes include auto-off and low-battery indicators, MIN/MAX, and data hold.
