## Mini Thermo-Anemometer with Built-in Compass

### Description

---

#### Mini Thermo-Anemometer with Built-in Compass

##### Description:-

This tripod-mountable miniature thermoanemometer is a must-have tool for field work. The meter combines a vane anemometer, thermometer, hygrometer, and compass into one small package. The delta-T function displays air temperature minus dew point, and the max function recalls the highest wind velocity reading over time. Scroll through real-time data or use the hold key to preserve a data point. Auto power-off saves battery life, but can be disabled for long-term monitoring.

- Pocket-sized meter folds up to protect screen and sensors
- Built-in compass provides wind direction with head, cross, and tailwind calculations
- Water-resistant housing floats and survives submersion up to 3 ft (1 m) and a 6-ft (2-m) drop.
