

Product Code . DS-AAM-10647

Compact Class, Mini-Vane Thermoanemometer

Description

Compact Class, Mini-Vane Thermoanemometer

Description:-

This compact multi-function Anemometer makes airflow measurement easy and effortless. The super compact vane is designed to measure air velocity (flow) and volume flow (cfm). Timed and multi-point mean flow calculations allow easy flow analysis, volume accumulation estimates. Min/Max values are one-button simple, while the Hold function freezes the current readings in the display for easy data recording. To calculate volume flow (cfm), just enter the air duct size and the meter automatically calculates and displays the volume flow. Meter features an auto-off function.
