

Product Code . DS-AAM-10652

Anemometer-Psychrometer with CFM/CMM and Enthalpy

Description

Anemometer-Psychrometer with CFM/CMM and Enthalpy

Description:-

Measures air speed (in ft/min, m/s, mph, km/hr, or knots), temperature in °F or °C, airflow volume in CFM or CMM, relative humidity, dew point and wet bulb temperatures, wind chill index, and enthalpy in Btu/lb or kJ/kg with this compact meter. This multi-function meter is small enough to fit in a pocket, and the tethered vane cap keeps it safe in a toolbox. See real-time measurements and track MIN/MAX/AVE session values for air speed and airflow volume. Take enthalpy measurements in ductwork to determine the efficiency of HVAC/R systems.

- Back-lit LCD is easy to see in any lighting condition
- Measure eight environmental conditions including airflow volume and enthalpy.
- Track MIN/MAX/AVE air speed and airflow volume
- Vane cap protects meter when not in use and is conveniently tethered to help prevent getting lost.
