Hydronic Manometers

Description

Hydronic Manometers

Description:-

The perfect instrument for test and balancing HVAC systems, checking pump performance, and setting balancing valves. Operates on four alkaline or NiMH rechargeable batteries. Provides flow and BTU/hr calculations. Measure and display differential, high side, and low side pressures simultaneously without having to change hose connections or instrument valve settings.

- Use to balance hydronic heating and cooling systems and to check pump performance.
- Reads pressure in PSI, ft H₂O, kPa, mm HG, in HG, in H₂O, bar
- Large backlit display for use in low illumination
- Reads volume in USGPM, UKGPM, m³h, l/s, l/m
- Durable splash-proof case.
