Low Flow Balometer Capture Hood

Description

Low Flow Balometer Capture Hood

Description:-

This Digital Balometer Features a 24" x 24" hood opening to fit over standard-sized grilles and diffusers located on ceilings, walls or floors. Weighing less than six pounds, the balometer allows for single operator use and access into tight spaces. The hood channels airflow through the base to directly measure air volume. Fast response LCD features an analog bar graph for monitoring airflow changes and displays digital readout. Measure air volume with or without hood connected to the balometer.

- Analog bar graph monitors air trends simultaneously with a digital display.
- Ideal for light commercial ventilation measurements.
