Multi-Parameter Pen-Style Meter with Calibration

Description

Multi-Parameter Pen-Style Meter with Calibration

Description:-

This unique meter can measure temperature, humidity, barometric pressure and dew point. The compact design features an electronic capacitance polymer film sensor not affected by condensation. Features include a hold button that freezes the current reading on the display and a recall button that displays the minimum and maximum readings since the unit was powered on. Tough ABS plastic housing and water-resistant design with O-ring seal and membrane keypad assure a long life in severe lab or harsh plant environments.

• Water-resistant design with O-ring seal and membrane keypad

• User selectable dual display shows humidity/temperature, humidity/dew point, barometer/temperature, or barometer/humidity.
