Multichannel Wireless Thermohygrometer

Description

Multichannel Wireless Thermohygrometer

Description:-

This Multichannel Wireless Thermohygrometer allows you to simultaneously view indoor temperature and humidity readings—locally and wirelessly from up to 8 remote transmitters located as far away as 98 ft (30 m). Indoor comfort icons offer quick notification if conditions are too cold, too hot/humid, or just right. The base station features a large LCD with automatic night light, making it easy to view readings in either the auto-cycle or manual mode. The thermohygrometer is ideal for multiroom environmental monitoring and comes with one wireless remote transmitter. Temperatures fall below 37.4°F (3°C), a snow icon warning appears on the base station display.

- Easy-to-read LCD with 1.3" (33 mm) oversized digits
- Easily switch from Fahrenheit to Celsius
- Trend arrows indicate changes in temperature/humidity readings
- Records Min/Max readings for each measurement session.
