Product Code . DS-HP-10714

Dew Point and Temperature Meter

Description

Dew Point and Temperature Meter

Description:-

Meter accurately measures dew point temperature from –40 to 140°F. Dewpoint Meter is ideal for use in industrial spot checking of compressed air lines, plastic molding processes, and other dry gas applications. Sensing probe features the unique Drycap polymer-based technology that enables reliable dewpoint measurement. Readings are displayed either numerically or graphically on the backlit LCD—simply press a key and the display changes to a real-time graphic display. The easy-to-connect sample cell adapter with stands condensation and is easily connected allowing it to be placed directly in pressurized spaces. Meter has a unique auto-calibration feature that extends the calibration interval and provides long-term stability.
