

Product Code . DS-HP-10721

Data Logging Light Meter

Description

Data Logging Light Meter

Description:-

The Data Logging Light Meter is designed for precision light intensity measurements, in lux or footcandles, for indoor/outdoor environments. Meter will help you meet lighting codes and standards, ensuring safety and quality control requirements while increasing comfort levels and productivity.

Key Features

- Reliable measurements, guaranteed! Precalibrated to NIST-traceable standards
- Record up to 87,000 measurements for expanded data analysis capability
- Data logging software with graphical display provides quick and easy data interpretation
- Expanded range of 0 to 400 klux meets a wide range of application requirements
- Silicon photo diode with spectral response filter ensures precision accuracy of $\pm 3\%$.
