

Product Code . DS-MM-10746

Soil Moisture Meter

Description

Soil Moisture Meter

Description:-

The meter is housed in a rugged ABS plastic case. It features reliable, temperature-stable semiconductor technology with an internal battery and calibration check. The membrane front panel is easy to use. Spring-loaded binding posts allow positive contact with the sensor. Monitor the moisture available to your plants with this meter and sensor. Use the meter to effectively schedule irrigation according to the plants' requirements. Prevents soil spoilage due to excessive water and poor drainage by continually monitoring soil moisture. Sensor is made from gypsum, cast around two stainless steel electrodes. Connect the lead wires to the meter and get immediate readings of available soil moisture.
