

Product Code . DS-LE-10822

Acetylene Cylinder

Description

DESCRIPTION :-

Acetylene is one hot gas. It has one of the hottest flame temperature of any commercially fuel gas (5,720°F), making it an excellent choice for welding, brazing and cutting steel alloys less than two inches thick.

In scientific applications, acetylene is used as an instrumentation gas and a fuel gas and is the most important of all starting materials for organic synthesis.

It readily combines with a wide range of elements and compounds, making it ideal for the commercial manufacture of various industrial and consumer products

Acetylene Cylinder with regulator used for Laser cutting & welding .

Capacity : 6.0m3.

With full of acetylene gas.
