

Product Code . DS-P-11122

Transistor

Description

Catalogue No. : “IDAC6147/1.18”

DESCRIPTION :-

- A NPN Transistor is a type of NPN bipolar junction transistor.
- Circuits where a low-current, high-speed transistor is required will employ a transistor.
- It is suitable for many applications like Electrical or Electronic mini or major projects, Amplifier purposes, DIY projects etc.
- Transistor Type: NPN
- Current Rating: 0.8A
- Voltage Rating: 40V
- Transparent and protected transistor module 2N 2222 NPN
