## Table Vice

### Description

---

#### DESCRIPTION :-

Cast Iron Heavy Duty Fixed Base Bench Vice locks material and allows you to work on it.

A very common application for the bench vise includes drilling.

This highly durable and efficient device is used for sawing, sanding, metalworking, and cutting.

It is directly attached to a work table for holding the work-piece for the operation of sawing, planing, and drilling.

This device is very useful for keeping the work-piece steady and for a grip bench vise has hardened steel jaws.

This will keep the functionality safe.

It comes with a large anvil built for shaping and fabrication work.

The jaws of this bench vice are knurled and made from carbon steel.

Body made of cast iron

Hardened and knurled

Jaw opening : 4"
